Hardware:
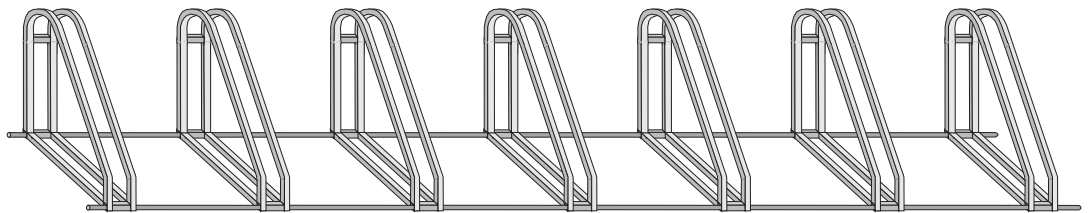

(2 per stanchion)
1/4" x 3/8" Setscrews

(1) Rudy Rack Sticker
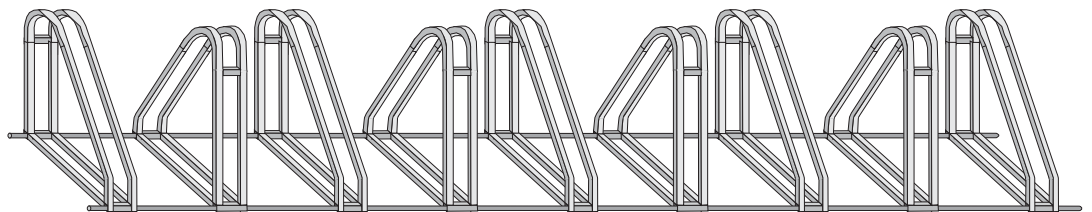

Adjustable Spacesaver

1. Locate the Adjustable Spacesaver Stanchions and 3/8" rod runners.

2. Simply slide the Adjustable Spacesaver Stanchions onto the runners as shown in the diagram below. The runners fit through the square tubing on the bottom of each stanchion.

3. Space each stanchion as desired, either all facing one direction (Wall Format) or alternating to both sides (Island Format). Tighten each stanchion by placing a 1/4" x 3/8" setscrew into the pre-threaded weld-tab on the front and back of each stanchion.

4. The setscrews will fix the stanchions in place onto the runners.

5. Note: Adjustable Spacesavers can be configured for any number of bikes. Runners are available in a variety of lengths. Follow these instrcutions for all Adjustable Spacesaver Configurations.
